

# **Studientage des Forschungsstudiengangs SS 2022**

Wednesday 29 June 2022 - Thursday 30 June 2022

Physics Department FAU Erlangen-Nürnberg

## **Book of Abstracts**

# Contents

A high-repetition-rate sub-half-cycle terahertz lightsource for lightwave-driven scanning tunneling microscopy . . . . .	1
Analyzing Calibration Data for Supernova Remnant N132D . . . . .	1
Attempting to create concave optical fiber end faces for resonators by polishing . . . . .	1
Auxiliary system approach for exchange-correlation-kernels in linear response theory . . . . .	1
Extension of the PLANETOCOSMICS framework for the calculation of geomagnetic cutoff histograms . . . . .	1
General discussion . . . . .	1
General discussion . . . . .	1
Implementation of the overlap Dirac operator in GPT . . . . .	1
Quantum Cooperativity in Spontaneous Decay . . . . .	2
Quantum error mitigation on the quantum approximate optimization algorithm . . . . .	2
Ranking of Global Climate Model realizations by their ability to capture the mean climatic state in Bavaria . . . . .	2
Research Project 2 . . . . .	2
Rubidium spectroscopy on nanocells . . . . .	2
Spacing ratios of the staggered Dirac operator with a chemical potential in lattice QCD . . . . .	2
Spin-Area Inequality in Loop Quantum Gravity . . . . .	2
Towards a Lindblad based nonequilibrium DMFT impurity solver . . . . .	2

Session 4 / 5

## **A high-repetition-rate sub-half-cycle terahertz lightsource for lightwave-driven scanning tunneling microscopy**

Session 3 / 11

## **Analyzing Calibration Data for Supernova Remnant N132D**

Session 5 / 16

## **Attempting to create concave optical fiber end faces for resonators by polishing**

Session 2 / 7

## **Auxiliary system approach for exchange-correlation-kernels in linear response theory**

Session 3 / 15

## **Extension of the PLANETOCOSMICS framework for the calculation of geomagnetic cutoff histograms**

17

## **General discussion**

8

## **General discussion**

Session 3 / 9

## **Implementation of the overlap Dirac operator in GPT**

**Session 1 / 1**

## **Quantum Cooperativity in Spontaneous Decay**

**Session 5 / 12**

## **Quantum error mitigation on the quantum approximate optimization algorithm**

**Session 2 / 13**

## **Ranking of Global Climate Model realizations by their ability to capture the mean climatic state in Bavaria**

**Session 2 / 3**

## **Research Project 2**

**Session 4 / 14**

## **Rubidium spectroscopy on nanocells**

**Session 3 / 10**

## **Spacing ratios of the staggered Dirac operator with a chemical potential in lattice QCD**

**Session 1 / 2**

## **Spin-Area Inequality in Loop Quantum Gravity**

**Session 2 / 6**

## **Towards a Lindblad based nonequilibrium DMFT impurity solver**
